### About Me

Enthusiastic and highly skilled software developer with a strong focus on front-end technologies. Proficient in JavaScript and experienced in building dynamic and responsive user interfaces using React, React Native, and Angular frameworks. A quick learner with a passion for staying up-to-date with the latest industry trends and best practices. Possesses excellent problem-solving abilities and a track record of delivering high-quality software solutions.

### Experience

#### May 2023 - Present (Software Developer)

InfluHitch

- Currently contributing to the development and enhancement of cross-platform mobile applications for Android and iOS platforms using React Native.
- Collaborating closely with the product and design teams to implement user-friendly and intuitive interfaces for the applications.
- Implementing platform-specific features and custom modules in React Native to ensure seamless integration with native functionalities on both Android and iOS.
- Conducting performance testing and profiling to optimize application performance and enhance user experience on various devices.
- Integrating RESTful APIs and managing data flow to enable real-time updates and synchronization of user data.

#### August 2022 - May 2023 (Software Developer)

Techcanopy Software Labs

- Developed web applications using Angular, React, and React Native frameworks.
- Collaborated with cross-functional teams to deliver high-quality software solutions, meeting project requirements and deadlines.
- Worked on both front-end and back-end tasks, ensuring seamless integration between the two layers.
- Conducted code reviews and implemented best practices to maintain code quality and consistency.
- Assisted in developing RESTful APIs and integrating third-party services for enhanced functionality.

#### Projects | College

- Successfully implemented a food recipe application using React and React Native, catering to both web and mobile platforms.
- Developed a map with markers using React web sockets and Express.js for real-time location tracking and updates.
- Collaborated with a team of developers to deliver the project within the specified timeframe.
- Demonstrated strong problem-solving skills and innovation in designing the application's features.
- Conducted tests and validations to ensure the effectiveness and efficiency of the implemented solutions.
